

What Can You Do With An Accounting Degree?

As you look at pursuing a career in accounting, you may be hearing, “You have two options. Choose A) Tax or B) Auditing.” NOT EVEN CLOSE!

An accounting degree is a foundation and a gateway to unlimited career paths. Accountants are found in every industry and accounting itself has many specialty areas.

Accounting is the language of business. Which means that every industry needs people with an accounting background to not only manage compliance, but to also be advisors and leaders who can guide informed decision making.
